Literacy and the Politics of Writing

Albertine Gaur, 2000

Annotation Writing is traditionally discussed as a product of individual intellectual achievement. The refreshing approach of this book gives the reader an insight into the place of writing as an essential part of the political infrastructure of a society. As ancient writings continue to be discovered and deciphered, it is becoming clear that long-held theories of writing development have rested more on speculation than on actual proof. However, no history of writing has adequately answered these questions nor brought to the subject the breadth of scope that this book achieves.

The Politics of Writing

Romy Clark, Roz Ivanic, 2013-01-11

Writing matters: it plays a key role in the circulation of ideas in society and has a direct impact on the development of democracy. But only a few get to do the kind of writing that most influence this development. The Politics of Writing examines writing as a social practice. The authors draw on critical linguistics, cultural studies and literacy studies, as they explore and analyse: * the social context in which writing is embedded * the processes and practices of writing * the purposes of writing * the reader-writer relationship * issues of writer identity. They challenge current notions of 'correctness' and argue for a more democratic pedagogy as part of the answer to the inequitable distribution of the right to write.

Reading and Writing for Civic Literacy

Donald Lazere, 2017-07-05

'Lazere's [book] is heaven-sent and will provide a crucial link in the chain of understanding how conflicts are structured and, most importantly, how they can be rationally addressed - a healthy antidote to the scepticism that has become so pervasive in academic life.' Alan Hausman, Hunter College

This innovative book addresses the need for college students to develop critical reading, writing, and thinking skills for self-defence in the contentious arena of American civic rhetoric. In a groundbreaking reconception of composition theory,
it presents a comprehensive critical perspective on American public discourse and practical methods for its analysis. Exercises following the text sections and readings help students understand the ideological positions and rhetorical patterns that underlie opposing viewpoints in current controversies - such as the growing inequality of wealth in America and its impact on the finances of college students - as expressed in paired sets of readings from the political left and right. Widely debated issues of whether objectivity is possible and whether there is a liberal or conservative bias in news and entertainment media, as well as in education itself, are foregrounded as topics for rhetorical analysis.

**The Light of Knowledge** Francis Cody, 2013-10-04 Since the early 1990s hundreds of thousands of Tamil villagers in southern India have participated in literacy lessons, science demonstrations, and other events designed to transform them into active citizens with access to state power. These efforts to spread enlightenment among the oppressed are part of a movement known as the Arivoli Iyakkam (the Enlightenment Movement), considered to be among the most successful mass literacy movements in recent history. In The Light of Knowledge, Francis Cody’s ethnography of the Arivoli Iyakkam highlights the paradoxes inherent in such movements that seek to emancipate people through literacy when literacy is a power-laden social practice in its own right. The Light of Knowledge is set primarily in the rural district of Pudukkottai in Tamil Nadu, and it is about activism among laboring women from marginalized castes who have been particularly active as learners and volunteers in the movement. In their endeavors to remake the Tamil countryside through literacy activism, workers in the movement found that their own understanding of the politics of writing and Enlightenment was often transformed as they encountered vastly different notions of language and imaginations of social order. Indeed, while activists of the movement successfully mobilized large numbers of rural women, they did so through logics that often pushed against the very Enlightenment rationality they hoped to foster. Offering a rare behind-the-scenes look at an increasingly important area of social and political activism, The Light of Knowledge brings tools of linguistic anthropology to engage with critical social theories of the postcolonial state.

**The Politics of Literacy** Martin Hoyles, 1977

**Becoming Political** Patrick Shannon, 1992

**Reading and Writing for Civic Literacy** Donald Lazere, 2015-12-03 This brief edition of a groundbreaking textbook addresses the need for college students to develop critical reading, writing, and thinking skills for self-defense in the contentious arena of American civic rhetoric. Designed for first-year or more advanced composition and critical thinking courses, it is one-third shorter than the original edition, more affordable for students, and easier for teachers to cover in a semester or quarter. It incorporates up-to-date new readings and analysis of controversies like the growing inequality of wealth in America and the debates in the 2008 presidential campaign, expressed in opposing viewpoints from the political left and right. Exercises help students understand the ideological positions and rhetorical patterns that underlie such
opposing views. Widely debated issues of whether objectivity is possible and whether there is a liberal or conservative bias in news and entertainment media, as well as in education itself, are foregrounded as topics for rhetorical analysis.

**Writing and Society** Nigel Wheale, 2005-08-18 Writing and Society is a stunning exploration of the relationship between the growth in popular literacy and the development of new readerships and the authors addressing them. It is the first single volume to provide a year-by-year chronology of political events in relation to cultural production. This overview of debates in literary critical theory and historiography includes facsimile pages with commentary from the most influential books of the period. The author describes and analyses: * the development of literacy by status, gender and region in Britain * structures of patronage and censorship * the fundamental role of the publishing industry * the relation between elite literary and popular cultures * and the remarkable growth of female literacy and publication.

**Critical Literacy** Colin Lankshear, Peter L. McLaren, Peter McLaren, 1993-01-01 Illustrates the differences and similarities between modernist and postmodernist theories of literacy, and suggests how the best elements of both can be fused to provide a more rigorous conception of literacy that will bring theoretical, ethical, political, and practical benefits. Some of the 14 essays are theoretical, other present case studies of

**Literacy and the Politics of Writing** Albertine Gaur, 2000 With the growth of modern information technology, it is time to re-examine the concept and purpose of writing, and question the long cherished idea that the alphabet stands at the apex of a hierarchy towards which all proper forms of writing must necessarily progress. This book shows that the primary purpose of writing is the ability to store and transmit information, information essential to the social, economical and political survival of a particular group. Writing, in whatever form, allows the individual the interact with the group, to acquire an amount of knowledge that far outweighs the scope of memory (oral traditions), and to be free to manipulate this knowledge and arrive at new conclusion. Providing a quick and easy entrance to information related to the subject, the volume contains a network of references leading the reader towards further information, and most entries are listed with bibliographical notes.

**Mainstreaming Basic Writers** Gerri McNenny, Sallyanne H. Fitzgerald, 2001-06-01 At a time when various political and administrative bodies are calling for the dissolution of basic writing instruction on four-year college campuses, the need for information concerning the options available to university decision makers has become more and more pressing. A wide range of professional judgments surrounding this situation exits. Mainstreaming Basic Writers: Politics and Pedagogies of Access presents a range of positions taken in response to these recent challenges and offers alternative configurations for writing instruction that attempt to do justice to both students' needs and administrative constraints. Chapter authors include, for the most part, professionals entrusted with the role of advocating for a student population often described as underprepared, in need of remediation, and at risk. Throughout the volume, contributors discuss current institutional
developments and describe curricular designs that instructors searching for innovative ways to meet the needs of their heterogenous student populations will find helpful as models of college writing program curricula and administration. This book’s focus is to give a fair representation of some of the more noted perspectives from nationally recognized scholars and administrators working in the field of basic writing. This presentation of key positions on the issue of mainstreaming basic writers at the college level is an important resource for all writing program administrators, composition and rhetoric students and scholars, and university decision makers from provosts to deans to department chairs.

Critical Literacy Maxine Greene, 1993-03-18 Illustrates the differences and similarities between modernist and postmodernist theories of literacy, and suggests how the best elements of both can be fused to provide a more rigorous conception of literacy that will bring theoretical, ethical, political, and practical benefits. Some of the 14 essays are theoretical, other present case studies of literacy programs for adults and other applications. Annotation copyright by Book News, Inc., Portland, OR

Reading and Writing for Civic Literacy Donald Lazere, Anne-Marie Womack, 2020-10-07 This rhetoric-and-reader textbook teaches college students to develop critical reading, writing, and thinking skills for self-defense in the contentious arena of American civic rhetoric. This edition is substantially updated for an era of renewed tensions over race, gender, and economic inequality—all compounded by the escalating decibel level and polarization of public rhetoric. Readings include civil rights advocate Michelle Alexander on the new Jim Crow, recent reconsiderations of socialism versus capitalism, Naomi Wolf’s and Christine Hoff Sommers’ opposing views on the beauty myth, a section on the rhetoric of war, and debates on identity politics, abortion, and student debt. Designed for first-year or more advanced composition and critical thinking courses, the book trains students in a wealth of techniques to locate fallacies and other weaknesses in argumentation in their prose and the writings of others. Exercises also help students understand the ideological positions and rhetorical patterns that underlie opposing views, from Ann Coulter to Bernie Sanders. Widely debated issues of whether objectivity is possible and whether there is a liberal or conservative bias in news and entertainment media, as well as in education itself, are foregrounded as topics for rhetorical analysis.

On Literacy Robert Pattison, 1984-02-02 Intellectually and morally acute, vibrantly alive ... parents, teachers or legislators who miss this richly clarifying discourse on the contemporary politics of literacy deserve to sit in the corner for a week.

The Politics of Writing Instruction Charles I. Schuster, 1991 The Politics of Writing Instruction: Postsecondary discusses the realities of composition as a discipline.

The Politics of Orality Craig Richard Cooper, 2007 This volume represents the sixth in the series on Orality and Literacy in the Ancient Greek and Roman Worlds. The present work comprises a collection of essays that explore the tensions and
controversies that arise as a society moves from an oral to literate culture. Part 1 deals with both Homeric and other forms of epic; part 2 explores different ways in which texts and writing were manipulated for political ends. Part 3 and 4 deals with the controversies surrounding the adoption of writing as the accepted mode of communication; whereas some segments of society began to privilege writing over oral communication, others continued to maintain that the latter was superior. Part 4 looks at the oral elements of Athenian Law.

The Social Uses of Writing Thomas Fox, 1990 This volume explores how a political and social theory of writing can inform pedagogy, including an analysis of how students' educational histories limit teacher and student roles, and how we might work to enlarge both. Through a critique of ethnography and an exploration of Friere's Pedagogy of the Oppressed, the author develops an interactive theory of teaching writing. In three central chapters, the volume treats gender, class and race issues in the teaching of writing by examining case studies of freshman writers. Within the case studies, the author shows how an interactive pedagogy helps students see how socially-held values, such as beauty, objectivity, upward mobility, and assimilation deeply affect how students write. The case studies give a sense of actuality to the author's ideas. Finally, the author argues that interpretation should replace evaluation as the central activity of writing courses.

Basic Writing as a Political Act Linda Adler-Kassner, Susanmarie Harrington, 2002 An empirical study of basic writing in the contemporary academy. It examines perceptions of in-school writing and how basic writing programmes have been created and maintained by drawing on basic writing syllabi and programmes in different American colleges and universities.

Writing Democracy Shannon Carter, Deborah Mutnick, Stephen Parks, Jessica Pauszek, 2019-08-14 Writing Democracy: The Political Turn in and Beyond the Trump Era calls on the field of writing studies to take up a necessary agenda of social and economic change in its classrooms, its scholarship, and its communities to challenge the rise of neoliberalism and right-wing nationalism. Grown out of an extended national dialogue among public intellectuals, academic scholars, and writing teachers, collectively known as the Writing Democracy project, the book creates a strategic roadmap for how to reclaim the progressive and political possibilities of our field in response to the twilight of neoliberalism (Cox and Nilsen), ascendant right-wing nationalism at home (Trump) and abroad (Le Pen, Golden Dawn, UKIP), and hopeful radical uprisings (Black Lives Matter, Occupy Wall Street, Arab Spring). As such, the book tracks the emergence of a renewed left wing in rhetoric and activism post-2008, suggests how our work as teachers, scholars, and administrators can bring this new progressive framework into our institutions, and then moves outward to our role in activist campaigns that are reshaping public debate. Part history, part theory, this book will be an essential read for faculty, graduate students, and advanced undergraduate students in composition and rhetoric and related fields focused on progressive pedagogy, university-community partnerships, and politics.
